

Introducing: The New Space Saver Reciprocating Medical Air Package

When floor space is tight, the best way to go is up. The new **Space Saver** reciprocating compressor package by **Patton's Medical** does just that.

Available in 7.5 through 20 hp duplex, triplex or quad configurations, it comes equipped with all the standard features as our other reciprocating packages and is fully **NFPA 99 compliant**.

Built of strong structural steel, this unit can easily be configured with **Single Point Connection** capabilities or as a modular system to fit your available space.

Please contact your local Patton's Medical sales representative today for more information.

While other companies try to produce what they think you need, we build what you want.

How may we help you?
